

Yousef Mohammed Salah

Full-Stack Software Engineer | AI Security Engineer | 3x Hackathon Winner

New Damietta, Egypt | yousefmsm@hotmail.com | linkedin.com/in/yousefmsm1 | github.com/YUST777 | yust.dev

EDUCATION

Horus University - B.S. in Artificial Intelligence & Cybersecurity

2024 - 2028

Faculty of Artificial Intelligence | Level 3 | New Damietta, Egypt

SELECTED EXPERIENCE

Verdict.run - Full-Stack Developer & AI Engineer

Jan 2026 - Present

- Engineered a TypeScript, React, and Next.js competitive-programming workspace with REST APIs, Playwright automation, and Judge0 sandbox execution.
- Built an AI tutor with Model Context Protocol and Remotion-generated explainers, driving **120,000+ LinkedIn impressions** at launch.

SAST.tech - AI Security Engineer

Feb 2026 - Present

- Built a Python, TypeScript, React, and Node.js platform that fetches repositories, runs Playwright-based security checks, and returns actionable findings.
- Connected LLM agents to automated remediation workflows; the project placed **2nd at GDG Delta** and **3rd at LUXSAI**.

ICPC HUE - Co-Founder & Full-Stack Developer

Nov 2025 - Present

- Launched Horus University's competitive-programming platform with React, Node.js, PostgreSQL, Docker, 650+ problems, video lessons, and leaderboards.
- Designed an isolated code runner that grades submissions in under one second; onboarded **300+ students**, qualified 8 teams for ECPC 2026, and reached 3,800+ first-month page views.

SpaceWorth - Machine Learning Engineer

Jul 2026 - Present

- Developed a Python, React, and Next.js real-estate valuation product using regression models and PostgreSQL, reaching **90% prediction accuracy**.
- Integrated Gemini Vision and a CAD-style canvas to extract dimensions from uploaded floor plans and turn them into usable estimates.

LEADERSHIP & COMMUNITY

- ICPC HUE:** Led platform development, training, media, and events for 300+ students; organized admissions and ECPC preparation.
- Technical creator:** Published engineering breakdowns and product launches that generated **170,000+ impressions** on LinkedIn.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, C++, SQL, Bash, HTML5, CSS3

Web & Backend: React, Next.js, Node.js, Express, Tailwind CSS, REST APIs, WebSockets, Vite

AI & Security: AI agents, RAG, Model Context Protocol, FAISS, PyTorch, Playwright, Puppeteer, YARA

Data & DevOps: PostgreSQL, Supabase, Redis, Docker, Linux, Git, GitHub, CI/CD, Judge0, Vercel, Cloudflare

HACKATHONS & CERTIFICATIONS

- 2nd Place - Hackathon Egypt 4.0:** GDG Delta national competition with 122 teams and 600+ developers; built the SAST.tech security platform.
- 3rd Place - LUXSAI AI Hackathon:** Delivered an AI security and pentesting workflow with automated vulnerability detection and code remediation.
- 3rd Place - National Forum for Sustainable Innovation:** Tanta University competition across 20+ universities; one of three national hackathon wins.
- Certifications:** NVIDIA DLI - Building RAG Agents with LLMs; ITI Machine Learning & AI Engineering; AZ Tech Solutions SaaS Product Strategy.
