

Yousef Mohammed Salah

Full-Stack Software Engineer | 3x Hackathon Winner

New Damietta, Egypt | 01028250064 | yousefmsm@hotmail.com | linkedin.com/in/yousefmsm1 | github.com/YUST777 | yust.dev

EDUCATION

Horus University - B.S. in Artificial Intelligence & Cybersecurity

2024 - 2028

Faculty of Artificial Intelligence | Level 3 | New Damietta, Egypt

AWARDS & COMPETITIONS

- **2nd Place Winner** - Hackathon Egypt 4.0 by GDG Delta, competing among 122 teams and 600+ developers nationwide. Feb 2026
- **3rd Place Winner** - LUXSAI AI Hackathon, Luxor University & Ministry of Higher Education. Mar 2026
- **3rd Place Winner** - 1st National Forum for Sustainable Innovation, Tanta University, across 20+ universities. Aug 2025

CERTIFICATIONS & TRAINING

- **NVIDIA DLI Certificate of Competency** - Building RAG Agents with LLMs. Aug 2026
- **ITI AI & Machine Learning** - Levels 1 and 2 completed. 2026

FEATURED PROJECTS

Verdict.run - Competitive Programming Workspace & AI Explainer

Jan 2026 - Present

- Engineered a full-stack platform mirroring Codeforces into a modern LeetCode IDE with an integrated Chrome extension for headless server-side submissions via Playwright and Scraping.
- Built an AI tutor using Model Context Protocol, Judge0 sandbox testing, and Remotion-generated explainers; launch content drove **120,000+ LinkedIn impressions**.

SAST.tech - Autonomous AI Security & Pentesting Web Platform

Feb 2026 - Present

- Engineered an autonomous AI security agent that fetches repositories, detects live vulnerabilities, and recommends fixes using Playwright and LLM agents.
- Won **2nd Place at GDG Delta** and **3rd Place at LUXSAI**; built the developer interface for interactive security audits and automated remediation.

icpchue.com - Competitive Programming Training Platform & Online Judge

Nov 2025 - Present

- Developed a full-stack judge and training platform featuring 650+ curated problem sets, recorded video solutions, multi-university leaderboards, and gamification.
- Engineered a sandboxed code execution engine with Docker, Node.js, and PostgreSQL that evaluates submissions in under one second with CPU and memory isolation.

SWRMZ.tech - Autonomous Swarm AI Security & DDoS Mitigation

2026

- Architected a cooperative swarm of AI security agents that monitors web traffic and server health, automatically triggering Cloudflare DDoS mitigation rules during attacks.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, C++, SQL, Bash, HTML5, CSS3

AI & Security: RAG systems, AI agents, Model Context Protocol, vector databases, FAISS, PyTorch, Playwright, Puppeteer, YARA

Web & Backend: Next.js, React, Node.js, Express, Tailwind CSS, TanStack Router and Query, Vite, REST APIs, WebSockets

Cloud, Databases & DevOps: PostgreSQL, Redis, Supabase, Docker, Linux, Railway, Git, GitHub, CI/CD, Judge0, Qualys A+ SSL

LEADERSHIP & COMMUNITY

- **Co-Founder & Web Lead, ICPC HUE** - Co-founded Horus University's first competitive programming community from scratch; led web platform development, media, and event organization, training 300+ students and qualifying 8 teams for ECPC 2026.
