

Yousef Mohammed Salah

Full Stack Engineer | React, Next.js, Node.js, Python

📞 01028250064 | 🌐 [linkedin.com/in/yousefmsm1](https://www.linkedin.com/in/yousefmsm1) | 📄 github.com/YUST777 | 🌐 yust.dev | ✉ yousefmsm@hotmail.com | 📍 Cairo, Egypt

PROFESSIONAL SUMMARY

Full Stack Engineer who builds and ships web applications end to end using **React, Next.js, TypeScript, Node.js, Python, PostgreSQL**, and **Docker**. Designed and deployed **Verdict.run** (competitive programming platform), **SAST.tech** (AI cybersecurity tool), and **icpchue.com** (training hub with 650+ problems), serving thousands of daily active users across scalable containerized infrastructure.

EDUCATION

Horus University - Bachelor of Science (B.S.) in Artificial Intelligence & Cybersecurity

2024 - 2028

Level 3 | Faculty of Artificial Intelligence | Cairo, Egypt

EXPERIENCE & PROJECTS

Verdict.run - Full Stack Engineer, Competitive Programming Workspace

01/2026 - Present

- Designed and built a full-stack developer tool that mirrors Codeforces problems in a LeetCode-style interface with a Monaco editor, custom tests, live submission status, Codeforces Mirror Mode, and a Chrome Extension using **TypeScript, JavaScript, React**, and **Tailwind CSS**.
- Integrated Excalidraw algorithm whiteboards, Judge0 code execution, and AI-generated video explanations through **RESTful APIs, Node.js**, and **Docker**; a launch post reached **120,000+ LinkedIn impressions**.

SAST.tech - Full Stack Engineer, AI Development & Security Platform

02/2026 - Present

- Designed and built a full-stack AI development and security platform with **TypeScript, Next.js**, and **Python** for coding, local project scans, GitHub repository scans, and vulnerability remediation in one workflow.
- Integrated **14 traditional SAST tools** for source scans; routed findings to AI agents to explain vulnerabilities, apply fixes, troubleshoot code issues, and write technical prevention notes for developers.
- Used **Playwright** in sandboxed **Docker** environments for automated UI and performance testing, reproducing bugs and checking fixes; built **REST APIs** with **PostgreSQL**. Won **2nd Place at GDG Delta** and **3rd Place at LUXSAI**.

icpchue.com - Full Stack Engineer, Competitive Programming Platform

11/2025 - Present

- Built a responsive web application with **650+ data structures and algorithms problems**, **22+ hours of lessons**, progress rewards, and **300+ registered students** using **JavaScript, React, HTML5**, and **CSS3**.
- Implemented a Judge0-backed online judge with automated test execution for **C++** and **Python** solutions and trained **8 teams** for ECPC qualification rounds using **Node.js, Docker, Linux**, and **PostgreSQL**.

SWRMZ.tech - Full Stack Engineer, Multi-Agent Security

07/2026 - Present

- Architected and integrated a multi-agent incident-response system using **Jev, Python**, and **RESTful APIs** to analyze server logs, detect DDoS attacks and malicious bots, and select response playbooks.
- Automated **Cloudflare** DDoS protection and bot mitigation when threats are detected.

LEADERSHIP & COMMUNITY

- Co-Founder & Web Lead, ICPC HUE** - Co-founded Horus University's competitive programming community and led its web platform, student training, and contest operations. 11/2025 - Present

AWARDS & COMPETITIONS

- 2nd Place** - **Hackathon Egypt 4.0 by GDG Delta** with SAST.tech, among 122 teams and 600+ developers nationwide. 02/2026
- 3rd Place** - **LUXSAI AI Hackathon** with SAST.tech, Luxor University. 03/2026
- 3rd Place** - **1st National Forum for Sustainable Innovation**, Tanta University, across 20+ universities. 08/2025

CERTIFICATIONS & TRAINING

- NVIDIA DLI Certificate of Competency** - **Building RAG Agents with LLMs**. 2026
- Information Technology Institute (ITI)** - AI Course, Levels 1 and 2. 2026

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, C++, SQL, Bash, HTML5, CSS3

Frontend: React, Next.js, Tailwind CSS, TanStack Router/Query, Vite

Backend & APIs: Node.js, Express, RESTful APIs, WebSockets

Data, DevOps & Testing: PostgreSQL, Redis, Supabase, Docker, Linux, Git, GitHub, CI/CD, Judge0, Playwright, Automated Testing

Engineering: Application Development, System Architecture, Systems Integration, Data Structures & Algorithms, Troubleshooting, Debugging, Bug Fixing, Performance Testing, Technical Documentation

AI & Security: AI Agents, RAG Systems, Model Context Protocol, Vector Databases (FAISS), PyTorch, LightGBM, YARA, Jev, Cloudflare
