

Yousef Mohammed Salah

Full-Stack Software Engineer | AI Security Engineer | 3x Hackathon Winner

New Damietta, Egypt | yousefmsm@hotmail.com | linkedin.com/in/yousefmsm1 | github.com/YUST777 | yust.dev

EDUCATION

Horus University - B.S. in Artificial Intelligence and Cybersecurity

2024 - 2028

Faculty of Artificial Intelligence | New Damietta, Egypt | Level 3

PROJECT EXPERIENCE

Verdict.run - Full-Stack Developer and AI Engineer

Jan 2026 - Present

[verdict.run](#)

- Built a TypeScript, React, and Next.js workspace with REST APIs and PostgreSQL, giving developers one place to practice, submit, and review solutions.
- Integrated Playwright, Judge0, and Model Context Protocol to automate submissions and explain solutions; launch content reached 120,000+ LinkedIn impressions.

SAST.tech - Full-Stack and AI Security Engineer

Feb 2026 - Present

[sast.tech](#)

- Built a Python, TypeScript, and React platform with Node.js, REST APIs, and Playwright to scan repositories and return actionable vulnerability findings.
- Connected LLM agents to automated remediation workflows, helping developers fix security issues; won 2nd place at GDG Delta and 3rd place at LUXSAI.

ICPC HUE - Full-Stack Developer

Nov 2025 - Present

[icpchue.com](#)

- Developed a TypeScript, React, and Node.js training platform with PostgreSQL, Docker, 650+ problems, video solutions, and university leaderboards.
- Built an isolated code runner that evaluates submissions in under one second, giving 300+ students faster feedback while enforcing CPU and memory limits.

SpaceWorth.site - Machine Learning Engineer

Jul 2026 - Present

[spaceworth.site](#)

- Built a Python, React, and Next.js valuation platform with regression models and PostgreSQL, reaching 90% prediction accuracy on the project dataset.
- Integrated Gemini Vision and a CAD-style canvas to convert uploaded floor plans into usable dimensions for property estimates.

ZeroThreat.xyz - AI Security Engineer

Aug 2025 - Present

[zerothreat.xyz](#)

- Built a React and TypeScript security platform and browser extension with AI and YARA-backed malware detection; reported 90% detection rate and won 3rd place at the Tanta National Summit.

LEADERSHIP AND COMMUNITY

- Co-Founder and Web Lead, ICPC HUE:** Led platform development, media, and events; trained 300+ students and qualified 8 teams for ECPC 2026.
- Founder, The 01 Studio:** Built Telegram market-analytics bots and mini-apps serving 2,500+ active users across 500+ groups.
- Technical Content Creator, LinkedIn:** Published engineering breakdowns and product case studies generating 170,000+ impressions.

TECHNICAL SKILLS

Languages and Web: Python, TypeScript, JavaScript, C++, SQL, HTML5, CSS3, React, Next.js, Tailwind CSS

Backend and Data: Node.js, Express, REST APIs, WebSockets, PostgreSQL, Supabase, Redis

AI and Security: AI agents, RAG systems, LLM integrations, Model Context Protocol, FAISS, PyTorch, Playwright, YARA

DevOps and Tools: Docker, Linux, Git, GitHub, CI/CD, Vite, Judge0, Vercel, Railway, Cloudflare

AWARDS AND CERTIFICATIONS

- 2nd Place:** Hackathon Egypt 4.0 by GDG Delta, among 122 teams and 600+ developers (Feb 2026).
- 3rd Place:** LUXSAI AI Hackathon (Mar 2026) and National Forum for Sustainable Innovation at Tanta University (Aug 2025).
- Certifications:** NVIDIA DLI Building RAG Agents with LLMs; ITI Machine Learning and AI Engineering; AZ Tech Solutions SaaS Product Strategy.
